INTERTANKO supports the FONASBA Quality Standard Version 5.0

INTERTANKO wholeheartedly welcomes the introduction of FONASBA's QUALITY STANDARD for SHIPBROKERS and AGENTS and is pleased to have contributed in a small way through our participation in FONASBA'S Port Tramp Agency Working Group (PTAWG). We believe that this Standard will provide the basis for a further world-wide quality enhancement of shipbroker and port agency services.

It is to be hoped that this robust and practical Standard will be widely adopted within the agent/shipbroker industries and as such contribute to the continuous improvement of the services extended to INTERTANKO members and the industry at large. INTERTANKO will therefore continue to work closely with FONASBA to promote the merits of the Standard as the basis by which port agents, shipbrokers and others may be identified for the quality of their services, integrity and commitment to training.

FONASBA and its member associations have previously confirmed their commitment to continuous improvement in the broking and agency communities in the spirit of the Poseidon Challenge, to which FONASBA has subscribed. INTERTANKO appreciates the same commitment to working together to raise standards across the various sectors of the maritime industries.

Yours sincerely,
INTERTANKO

Peter M Swift
